In paper sessions throughout this program, the asterisks (**) denote finalists for monetary awards in the Outstanding Paper Award for Professional Members. These awards were funded through a grant from the American Psychological Association Science Directorate. Award winners will be announced at the Friday evening reception.
GENERAL INFORMATION

WORKSHOPS for Continuing Education credit are scheduled throughout the convention. (See sessions A-K at the beginning of the meeting schedule.) Workshop registration is at the main SEPA registration desk. SEPA registration is a prerequisite to workshop registration.

CONTINUING EDUCATION CREDIT will be offered for presentations of the SEPA Invited Speakers, marked with a [CE] throughout the program booklet. Each of these sessions will offer one hour of credit for a fee of $10. Information on registration and payment will be available on-site at the convention. Persons who verify their attendance, remit payment, and submit an evaluation form for these sessions will receive a CE certificate for each session attended.

POSTER SESSIONS are scheduled in Ballrooms E, F on the first floor of the Convention Center. (See floor plan at the back of this program.)

EXHIBITS are located in Ballrooms E, F on the first floor of the Convention Center. Hours of operation are Wednesday from 5:00 pm to 8:00 pm, Thursday from 8:00 am to 4:00 pm, and Friday from 8:00 am to 4:00 pm.

MESSAGES may be left on the Message Board outside the exhibit area.

PSI CHI will sponsor a Psi Chi Orientation on Thursday from 9:00 am to 11:00 am in the second-floor Rotunda between the Marriott and the Convention Center. The Tennessee River Room meeting room (1st floor) of the Marriott Hotel will be used as the "Psi Chi Hospitality Room" Thursday and Friday from 8:00 am to 4:00 pm. You do not have to be a Psi Chi member to visit the Hospitality Room; all meeting attendees are welcome to meet students from other schools.

Receptions are scheduled in Ballrooms E, F of the Convention Center on Wednesday, and in Ballrooms H, I on Thursday and Friday.

The Administrative Officer is responsible for all arrangements (such as rooms for social functions or special meetings) and will make all such contacts with the hotel. Please send any requests to Rosemary Hays-Thomas at the SEPA e-mail address: sepa@uwf.edu.

The Southeastern Psychological Association is committed to a full program of continuing education for its members and for other interested colleagues. This year, continuing education opportunities include 3-hour workshops, a 6-hour workshop, a 2-hour workshop, and selected 1-hour speaker sessions.

PARTICIPATION: Workshops are open to all registered attendees of the SEPA meeting. Each workshop description details the intended audience. Graduate students may register to attend workshops without endorsement of a faculty member.

REGISTRATION: Pre-registration is strongly encouraged! Full refunds will be made for cancellations prior to March 1, 2010. For registration information, see the form on the previous page.

Workshops A, B, D, E, F, G, I, J, and K offer three (3) hours of CE credit. Workshop C offers two (2) hours, and Workshop H offers six (6) hours of CE credit. The cost for three-hour workshops is $50 for professionals and $25 for students. The cost for the six-hour workshop is $100 for professionals and $50 for students. The cost for the two-hour workshop is $30 for professionals and $15 for students. All on-site registrations and payment for CE workshops will be processed at the SEPA registration desk.

ATTEND INVITED SPEAKERS’ PRESENTATIONS — RECEIVE CE

Continuing education credit will be offered for presentations of the SEPA Invited Speakers, marked with a [CE] throughout the Convention Program booklet. Each of these sessions will offer one hour of credit for a fee of $10.

Information on registration and payment will be available online, in the printed program, and on-site at the meeting. You will receive a CE certificate for each one-hour session that you attend, and for which you remit payment and submit an evaluation form.
A. Thursday, 9:00-12:00

SUICIDE PREVENTION

This interactive and practice-based training is designed to increase awareness about suicide and suicide prevention on college campuses. Through discussion, role plays, lecture, and audiovisual presentations, workshop participants will learn factual information about suicide and suicide prevention (e.g., the incidence among college students, risk factors and warning signs). Through hands-on and practice activities they will also learn how to provide “first aid” for suicide prevention.

Workshop participants, at the completion of this activity, will be able to:
1. Articulate, using current statistical information, why suicide and suicide prevention services are needed on college campuses;
2. List at least five (5) of the common risk factors and warning signs for suicide among college students;
3. Describe several strategies one might use to respond effectively to an individual who is suicidal; and
4. Discuss resources available within the community, online, etc. that may be useful when dealing with a suicidal individual.

FOR: Anyone who comes in contact with college students. It may be particularly useful for individuals who serve as “gatekeepers” or points of contact for students on college campuses (e.g., resident advisors, counselors).

LEADERS: Theresa Montgomery Okwumabua, PhD, The University of Memphis
Mike Labonte, BS, The Crisis Center
Naomi Blake, BS, The University of Memphis

B. Thursday, 9:00-12:00

[3 CE Credits] Room: Lookout

ANGER MANAGEMENT IN CHILDREN AND ADOLESCENTS

Anger control problems in children and adolescents constitute one of the major reasons for referral for psychological services. It has been estimated that nearly two thirds of the referral for these groups contain some anger management problems. The current workshop will present a model for the understanding of anger control problems and an empirically based treatment program for helping these individuals better manage their anger. The treatment approach is based on extensive clinical and research findings and fits into the emerging number of empirically supported treatment programs for children and adolescents.

Workshop participants, at the completion of this activity, will be able to:
1. Explain the cognitive model of anger;
2. Apply the cognitive model of anger to various client anger management problems;
3. Explain the cognitive model for the treatment of anger management problems; and
4. Apply the principles of the cognitive model of anger management with their clients.

FOR: Graduate students and professionals in applied psychology.

LEADERS: A. J Finch, Jr, PhD, ABPP, The Citadel
W. M. Nelson III, PhD, ABPP, Xavier University
C. Thursday, 12:00-2:00  [2 CE Credits]  Room: Plaza B

ASSESSING AND IMPROVING UNDERGRADUATE RESEARCH

Calls for increased participation by undergraduates in research experiences has led to growth in these opportunities, but implementing both experimental and applied research experiences are still common issues with which departments struggle. Numerous resources now exist to assist departments with developing appropriate learning goals and assessment measures, implementing successful course sequences, and integrating summer and other non-classroom based research experiences. The first hour of this workshop will make use of discussion and exercises to examine the myriad implementation issues and some practical solutions. The second hour will focus on the assessment and ongoing improvement of those efforts.

Workshop participants, at the completion of this activity, will be able to:

1. Articulate the rationales for undergraduate psychology’s curricular emphasis on statistics and research methods and translate these into relevant student learning outcomes that are consistent with a department’s mission;
2. Compare and contrast their institution’s curricular design with various successful and promoted models;
3. Identify aspects of curricular and course design that promote long-term student retention of statistical and methodological knowledge and skills;
4. Identify, construct, locate, select, and utilize appropriate assessment tools;
5. Identify opportunities in their undergraduate curriculum for both experimental and applied research opportunities, both in and out of the classroom; and
6. Identify current best practices regarding the incorporation of research and research methods in an undergraduate psychology curriculum.

FOR: Any department chair or area coordinator responsible for undergraduate program development and any college-level teacher or graduate student responsible for statistics, research methods, laboratory, and senior-thesis courses.

LEADERS: Wayne S. Messer, PhD, Berea College
Robert J. Smith, PhD, Berea College

D. Thursday, 1:00-4:00  [3 CE Credits]  Room: Signal

ETHICAL CONCERNS WITH DUAL RELATIONSHIPS

Problematic dual relationships are among the most common reasons for malpractice lawsuits being lodged against mental health professionals. Dual relationships and related concerns will be discussed in an effort to heighten awareness and to avoid potential liability. The workshop will be conducted in both a lecture and discussion format. Attendees are asked to bring case examples of ethical dilemmas related to dual relationships to discuss as time allows.

Workshop participants, at the completion of this activity, will be able to:

1. Describe examples of potential problematic Dual Relationships;
2. Provide a rationale for avoiding Dual Relationships with clients;
3. Describe risks associated with Dual Relationships; and
4. Describe common dilemmas for the therapist relating to clients in dual roles.

FOR: Masters and PhD level professionals and graduate students.

LEADER: Robert W. Hill, PhD, Appalachian State University
E. Thursday, 1:00-4:00 [3 CE Credits] Room: Lookout

BETTER AGING: THE GOOD, BAD, AND UGLY

The purpose of the workshop is to promote preventive and remedial strategies for successful aging. These strategies, emphasizing prevention, are categorized into physical, psychological, and social domains. Both societal and personal rights and responsibilities will be identified, as well as technological advances that promote caregiving options. Participants will have opportunities to engage in preventive and remedial strategy exercises.

Workshop participants, at the completion of this activity, will be able to:

1. Demonstrate principles of successful, normal, and unsuccessful aging in the physical, psychological, and social realms;
2. Identify key factors promoting positive aging;
3. Promote successful aging strategies with focused personal and group activities; and
4. Advocate for personal and communal technologies to enhance self- and other-caregiving for better aging.

FOR: Open to all levels of academic and mental health professionals, but will especially benefit lifespan/adulthood and aging/mental health academics and practitioners.

LEADERS: Douglas D. Friedrich, PhD, University of West Florida
Neil Davis, EdD, University of West Florida

F. Friday, 9:00-12:00 [3 CE Credits] Room: Plaza A

EATING DISORDERS: FROM DIAGNOSIS TO TREATMENT

This workshop is designed to aid clinicians who are trying to assess and treat patients who present with eating disorders (Anorexia Nervosa, Bulimia Nervosa, Eating Disorder NOS, Binge Eating Disorder). Etiological theories, risk factors, and medical concerns will be presented, as will a multidisciplinary assessment process and empirically supported treatment approaches. Common therapeutic challenges and ethical issues specific to the treatment of eating disorders will be addressed. Case examples and accompanying food diaries, journal entries, art work, videotapes, etc., produced by former patients, will be used to highlight educational objectives.

Workshop participants, at the completion of this activity, will be able to:

1. Identify the diagnostic criteria that determine eating disorder diagnoses;
2. Discuss differential diagnosis considerations;
3. Describe the necessary components of a thorough biopsychosocial evaluation for patients suspected of eating disorders;
4. Identify the comorbid psychological factors that most often accompany eating disorders;
5. Discuss the ambivalence, denial and resistance often revealed by patients who present for treatment of eating disorders;
6. Recognize the importance of a comprehensive multidisciplinary treatment plan for typical eating disorder patients; and
7. Describe the common medical problems, refeeding challenges, and psychopharmacological approaches to the treatment of the eating disorders.

FOR: Open to all; however, those who work with clients with eating disorders, or plan to work with clients with eating disorders, will most benefit.

LEADERS: Christian Lemmon, PhD, Medical College of Georgia
Rebecca Rogers, PhD, Augusta State University
DISSEMINATION AND TRANSPORTABILITY OF
PARENT CHILD INTERACTION THERAPY
TO COMMUNITY AND APPLIED SETTINGS

Parent Child Interaction Therapy (PCIT) is an empirically supported treatment for children ages 2–7 with disruptive behavior problems. Although PCIT was originally designed for parents and children, it has been used to help other adult–child dyads such as grandparents, foster parents, and teachers. This workshop will provide an overview of PCIT and will engage participants in hands-on practice with the Child Directed Interaction skills. Presenters will also review recent research that has extended the applications of PCIT to include prevention efforts with community volunteers, mentors, and undergraduate psychology students.

Workshop participants, at the completion of this activity, will be able to:

1. Recognize the theoretical background for Parent Child Interaction Therapy (PCIT);
2. Recognize the skills for the Child Directed Interaction phase of PCIT;
3. Describe the differences between modifying, adapting, and tailoring treatment in PCIT;
4. Identify parenting skills that can be taught to non-parent populations as a means of intervention and prevention;
5. Describe the advantages and barriers of transporting intervention and research to classrooms and communities;
6. Discuss an innovative collaboration between professional psychologists in training, undergraduate volunteers, and a local community service agency involved in a project investigating the effectiveness of a modified child-directed interaction program working with high-risk children;
7. Discuss the effectiveness of modified and abbreviated trainings on comprehension and implementation of PCIT skills; and
8. Discuss the implications for using empirically supported techniques with new populations.

FOR: Open to all, but a background in learning and behavior theory would be helpful.

LEADERS: Ember Lee, PhD, Rady Children's Hospital
Elizabeth Brestan Knight, PhD, Auburn University
Shalonda Brooks, MS, Auburn University
Meenakshi Lambha, MS, Dupont Children's Hospital

LD AND ADHD: A LIFESPAN APPROACH

LD and ADHD are lifelong conditions although their impact is often overlooked in adults. Further, clinicians' training with regard to understanding, assessment and intervention for these conditions across the lifespan tends to be superficial. This workshop will provide an overview of current literature on the major subtypes of LD/ADHD. Through a combination of didactic presentation and case material, developmental issues, assessment, and intervention will be addressed.

Workshop participants will, at the completion of this activity, be able to:

1. Identify the major sub-types of LD and ADHD;
2. Formulate an appropriate assessment approach for children and adults with LD and ADHD; 
3. Describe the psychological impact, developmentally, of LD and ADHD across the lifespan; 
4. Discuss some of the ways that LD and ADHD factor into marital problems as well as performance problems in the workplace; and 
5. Formulate more effective treatment plans, taking information processing style into account.

FOR: Open to all.

ETHICAL DILEMMAS: TEACHING, RESEARCH, AND PRACTICE

A case-based approach to solving ethical dilemmas in teaching, research, and practice will be presented. Steps in an ethical decision model will be used and relevant ethical codes will be presented to support the decision. Participants will use an individual dilemma observed or experienced in their work.

Workshop participants, at the completion of this activity, will be able to:

1. Solve ethical dilemmas in teaching, research, and practice using an ethical decision model;
2. Locate the ethical principle or code that supports choices to make in decision making in conflict situations;
3. Identify potential dilemmas under each of the five ethical principles and 10 codes of APA;
4. Identify ways to prevent ethical dilemmas in their workplace in order to avoid risky behaviors with implications of legal or ethical recourse.

FOR: Instructors and professors who teach courses in psychology; professors who engage in research and supervise research of students’ research in classes, theses, dissertations and publications of research; practitioners in the areas of Clinical, Counseling, School, and Industrial/Organizational Psychology; and Consultants in the field; psychology students at all levels

LEADER: Annie M. Wells, PhD, Alabama A&M University
THE ETHICAL PRACTICE OF FORENSIC PSYCHOLOGY

This workshop focuses on the ethical practice of forensic psychology. After a brief overview of the practice of forensic psychology, participants will learn the potential ethical pitfalls in the areas of forensic evaluations, forensic consultation and appearing as an expert witness. Participants will review relevant sections of the Ethics Code as well as the “Specialty Guidelines for Forensic Psychologists.” Participants will be provided with an eight-step decision model developed for resolving ethical dilemmas in the practice of forensic psychology. Information will be presented didactically and through small-group experiential exercises in order to analyze case studies.

Workshop participants, at the completion of this activity, will be able to:
1. Describe the specialty of forensic psychology and identify specific activities within the specialty;
2. Identify potential ethical conflicts associated with forensic assessment;
3. Identify potential ethical conflicts associated with forensic consultation;
4. Identify potential ethical conflicts associated with appearing as an expert witness; and
5. Articulate an eight-step decision model for resolving ethical conflicts in forensic psychology.

FOR: Open to graduate students and mental health professionals who are considering entry into forensic psychology or who are currently practitioners in the field.

LEADER: Christopher Cronin, PhD, Saint Leo University

RITES OF PASSAGE

This interactive workshop focuses on “rites of passage” as a strategy to prevent “at risk” youth from engaging in risky behaviors. Using the “Let the Circle Be Unbroken” approach as a model, participants will learn about implementing a “rites of passage” training program, including its intent (e.g., to help youth achieve a sense of who they are), process (e.g., how to get a program started, components of a successful program) and expected outcomes (e.g., confident youth). The importance of program evaluation will be addressed.

Workshop participants, at the completion of this activity, will be able to:
1. Discuss what “rites of passage” training is and is not, and how it might be used within each participant’s community to reduce the likelihood that young people become involved in risky behaviors;
2. Discuss some theoretical approaches and findings from research that supports “rites of passage” as a strategy for prevention of risky behavior;
3. Discuss the intent, process and expected outcomes for a “rites of passage” training program;
4. Discuss the key components of an effective “rites of passage” program;
5. Discuss the process involved in establishing, implementing, evaluating, and sustaining a “rites of passage” program; and
6. Make contact with others who are also interested in utilizing “rites of passage” activities and programs with “at risk” youth.

FOR: Those working with “at risk” youth, especially those interested in implementing a holistic, comprehensive, culturally relevant and meaningful prevention or intervention program for adolescent risk behavior reduction.

PROGRAM GUIDE

Each session is marked with either MH or CC in order to designate the location the session will be held. Those marked with MH will be held at the Marriott Hotel. Those marked with CC will be held at the Convention Center. For example, the Poster Session on the next page is marked with CC-Ballrooms E, F. That means the session is scheduled in Ballrooms E, F of the Convention Center.

The Ballrooms in the book may also be referred to as Banquet Rooms by the Convention Center.

Throughout the program some, not all, of the Paper Sessions will have individual presentations marked with ** right before their number and title. This denotes that these particular paper presentations are being considered for an Outstanding Professional Paper Award. The winners of the award will be announced at the Friday evening reception scheduled from 5:00-6:30 p.m. in Ballrooms H, I.
WEDNESDAY, March 10, 2010

1. SEPA EXECUTIVE COMMITTEE MEETING  
   2:00 - 5:00 pm  
   MH - Signal Room  
   David A. Washburn, Georgia State University, presiding

2. POSTER SESSION: Aggression & Violence; Addictions; Student Research Award Semi-Finalists  
   6:00 - 7:30 pm  
   CC - Ballrooms E, F

In addition to topical posters, this session presents the semi-finalists for the Graduate Student Research Award and the CEPO Student Research Awards for Research on Women and Minorities.

Note: The semi-finalist posters are marked with Ψ. Finalists for the Graduate Student Award are scheduled for paper presentation on Thursday, March 11, at 9:00 a.m. in Meeting Room 3. Finalists for the CEPO Student Research Awards are scheduled for paper presentation on Saturday, March 13, at 11:00 a.m.

Metacognitive Aging: Spared monitoring, impaired control?

Dayna Touron, University of North Carolina at Greensboro, presiding

Despite substantial age-related changes in memory abilities, most evidence indicates that metacognitive monitoring of learning does not decline with aging. The symposium will include four presenters and a discussant who will evaluate age differences in the accuracy of metacognitive monitoring as well as age differences in the utilization of metacognitive knowledge.

JOLs are related to both objective and subjective performance indices. Jarrod Hines, Georgia Institute of Technology.

Younger and older adults’ metacognitive inferences for source monitoring. Beatrice Kuhlmann, University of North Carolina at Greensboro.

Are there age-related deficits in episodic feeling-of-knowing (FOK)? Starlette Sinclair, Georgia Institute of Technology.

Strategy self-reports and gazes during older adults’ skill acquisition. David Frank, University of North Carolina at Greensboro.

Discussant:  Christopher Hertzog, Georgia Institute of Technology

WILLIAM JAMES DISTINGUISHED LECTURER
(Presentation supported by Association for Psychological Science)

Thinking with Your Head and Your Heart:
Developmental Dynamics in Everyday Problem Solving

Fredda Blanchard-Fields, Georgia Institute of Technology

David A. Washburn, Georgia State University, presiding

Dr. Blanchard-Fields will discuss the conditions under which older adults are most and least effective at problem-solving and emotion regulation. She will examine this process in the lab and in everyday real time using behavioral and biomarker indices of effective emotion regulation and problem solving in young adulthood through older adulthood.

[1 CE credit – please sign up for credit at the door and complete evaluation after the session. Please pay at workshop station at registration desk to receive certificate.]

Participants, at the completion of this activity, will be able to:

1. Identify the conditions under which older adults can effectively regulate their emotions;
2. Describe converging methods for studying emotion regulation including behavioral and biomarker techniques;
3. Identify developmental differences in everyday problem solving and emotion regulation strategies and why; and
4. List advantages of a balance between emotion and cognition in solving everyday problems.

CEPO/SEPA INVITED ADDRESS

African American Males/Empowering Youth

Deryl Bailey, The University of Georgia

Jennifer Friday, Friday Consulting Group, presiding

(Conversation Hour to follow at 3:10 pm in Plaza B)

Organizations and communities are the sum of how their members think and behave. If we are to change the educational and life trajectory of ALL students, especially African American males, we must change the way we think about, talk about, and behave with these students. Empowered Youth Programs elevates its “talk to action” on behalf of these students in our schools and communities.

[1 CE credit – please sign up for credit at the door and complete evaluation after the session. Please pay at workshop station at registration desk to receive certificate.]

Participants will, at the completion of this activity, be able to:

1. Discuss the trajectory for African American males in education and society;
2. Describe the additional developmental tasks encountered by African American male adolescents and the unique challenges they face during adolescence;
3. Discuss basic assumptions that serve as a foundation for Empowered Youth Programs, specifically Project: Gentlemen on the Move, as they relate to developing and nurturing academic and social excellence in African American males; and
4. Discuss the importance of comprehensive and developmental approaches to empowering adolescent African American males and the promises and pitfalls of developing, implementing, and sustaining successful enrichment initiatives for African American males.
19. CONVERSATION HOUR  
11:00 am - 11:50 pm  
CC - Meeting Room 7  
Improving Writing in Psychology: Perspectives from Professors and Students  
Participants will discuss strategies for improving undergraduate students’ writing, and their own findings on what works and what does not. They will also discuss the student perspective on this issue, with a successful undergraduate student writer sharing some specific suggestions with fellow psychology students.  
Participants:  
Erica Gannon, Clayton State University  
Antoinette Miller, Clayton State University  
William Bradley McKibben, Clayton State University

20. PAPER SESSION: Negative Aspects of Relationships

22. SYMPOSIUM

Making Psychology Classes More Interactive by Using In-Class Activities

Jennifer Hughes, Agnes Scott College, presiding

Five faculty members will discuss the use of applied assignments/activities in human sexuality, introductory psychology, cognitive psychology, social psychology, and research methods courses. These assignments help to make the courses more interesting and allow for more engagement with the material.

Engaging students in human sexuality courses by answering anonymous questions. Jennifer Hughes, Agnes Scott College.

Using the game of “Hot and Cold” to teach shaping. John Carton, Oglethorpe University.

Referencing popular cultures vs. hands-on demonstrations in teaching cognitive psychology. Lisa VanWormer, University of West Florida.

Improving students’ understanding of the power of social influence. Kimberly Kinsey, Agnes Scott College.

Using a murder mystery to teach inductive and deductive reasoning. Leah Zinner, Oglethorpe University.

Diagnoses, Dimensions, DSM-V, and a Transdiagnostic Approach: Time to Get Radical

David H. Barlow, Boston University

David A. Washburn, Georgia State University, presiding

(Conversation Hour to follow at 3:00 p.m. in Meeting Room 7)

To address issues of comorbidity, subthreshold presentations, and the large number of NOS diagnoses, DSM-V will likely organize groups of disorders, including emotional disorders, along dimensions. A scheme will be presented that collapses current DSM-IV emotional disorders into empirically supported common dimensions shared by all disorders, including temperaments, mood, current disorder constructs or “key features,” and extent and types of avoidance. This approach integrates fully with new transdiagnostic unified treatment approaches applied to a variety of emotional disorders by targeting their shared features.

[1 CE credit – please sign up for credit at the door and complete evaluation after the session. Please pay at workshop station at registration desk to receive certificate.]

Participants, at the completion of this activity, will be able to:

1. List dimensions of temperament and key features that comprise the emotional disorders;
2. Describe the Triple Vulnerability Theory of the etiology of emotional disorders;
3. List different emotional avoidance strategies; and
4. Describe core therapeutic strategies used to treat emotional disorders.

Move Over Individuals: Making Room for Groups in Teaching and Learning

Donelson R. Forsyth, Jepson School of Leadership Studies, University of Richmond

Patricia Donat, North Georgia College and State University, *presiding*

Whereas psychologists traditionally adopt a person-centered approach to understanding individuals’ thoughts, action, and emotions, a multilevel perspective recognizes that individuals are also members of larger social units that seek shared, collective outcomes. Teachers and learners are embedded within groups, teams, organizations, and communities and so teaching and learning is influenced not only by the microlevel, individualistic processes, but also mesolevel and macrolevel processes examined by social and organizational psychologists. Viewing students as both individual learners and group members requires examining group-level processes in the classroom, including social networking, learning in teams, and normative pressures. Similarly, for instructors, a multilevel approach provides new insights into old issues of pedagogy and assessment, including the use of group discussion, classroom climate, and the difficulties in team approaches to teaching. Practical suggestions for approaching teaching and learning from multiple levels are considered.

[1 CE credit – please sign up for credit at the door and complete evaluation after the session. Please pay at workshop station at registration desk to receive certificate.]

Participants, at the completion of this activity, will be able to:

1. Describe a multilevel perspective on teaching and learning that considers both psychological and interpersonal influences on human behavior, cognition, and emotion;
2. Analyze the implications of a group-level approach to individual learners’ outcomes, including collaborative learning, the development of norms that support or conflict with learning goals, and studying in groups;
3. Analysis of the implications of a group-level approach to teaching, including team teaching and using team-based learning methods; and
4. Identification of practical suggestions for strengthening learning outcomes by harnessing the power of group approaches in teaching and learning.

Good Monkeys Gone “Bad”

David A. Washburn, Georgia State University

Michael Rulon, Covenant College, presiding

In recent years, monkeys and apes tested on game-like computerized tasks have demonstrated amazing competencies that were previously undocumented in animals. In this talk, however, we will focus on some surprising “failures to learn” by these monkeys, and see what can be learned about learning when monkeys fail to learn.

[1 CE credit – please sign up for credit at the door and complete evaluation after the session. Please pay at workshop station at registration desk to receive certificate.]

Participants, at the completion of this activity, will be able to:

1. Distinguish between relational learning and associative learning, as types of learning that characterize human as well as animal behavior;
2. Discuss new research paradigms that have been developed for research with nonhuman primates, children, and human adults; and
3. Discuss, after having received instruction on the value of the comparative perspective in psychological inquiry, that human behavior can be seen in a broader biological context.

The Role of Affect in Public and Private Flashbulb Memories

Rod Vogl, Christian Brothers University, presiding

The contributors examined the accuracy and predictors of flashbulb memories. More specifically, they investigated the role of affect in both public and private flashbulb memories. Overall, affect significantly influenced the recall of flashbulb memories. Also, the Fading Affect Bias was observed in public and private flashbulb memories.

Affective modulation of autobiographical memory: Evidence from public/private flashbulbs. John N. Bohannon III, Butler University; Megan Julian, University of Pittsburgh; William Aue, Syracuse University; Brett Agypt, University of North Carolina-Charlotte; M. Hinton, Western Michigan University; Adam Hilliard, University of Akron; Christopher Henry, University of Texas at Austin.

Individual differences in religiosity/spirituality as predictors of Fading Affect Bias. Jeffrey Gibbons, Sherman A. Lee, Jennifer Gamble, Angela Toscano, Andrew Hartzler, Stephanie Kofron, Sarah White, and Benjamin Roseberry, Christopher Newport University.

Flashbulb memories of the election of President Barack Obama. W. Richard Walker, Rosalyn Shelton, and Sarah Forbes, Winston-Salem State University; Rodney J. Vogl, Christian Brothers University.

A Quiet World: The Psychology of Hearing and Hearing Loss

David G. Myers, Hope College

Patricia Donat, North Georgia College and State University, *presiding*

*(Conversation Hour to follow at 11:00 a.m. in Meeting Room 7)*

Drawing on personal experience and psychological science, David Myers will explore the psychology of hearing and hearing loss. He will also explore user-friendly assistive technologies that reflect “the human factor,” and will describe efforts to transform American assistive listening technology and to double the functionality of hearing aids and cochlear implants.

[1 CE credit – please sign up for credit at the door and complete evaluation after the session. Please pay at workshop station at registration desk to receive certificate.]

Participants, at the completion of this activity, will be able to:

1. Summarize how our experience of sound arises from bottom-up processing and top-down expectations;
2. Describe the prevalence and consequences of hearing loss, and influences on people’s acknowledgement of hearing loss;
3. Identify new assistive technologies for people with hearing loss; and
4. Explain how American assistive listening technology might better appreciate the “human factor.”

SIEGEL-WALLSTON INVITED ADDRESS

The Evolutionary Ecology of Sex Neutral ‘Sex Role’ Behavior

Patricia Adair Gowaty, University of California, Los Angeles

Patricia Donat, North Georgia College and State University, presiding

A new model that takes into account demographic stochasticity, time available for mating, and likely fitness outcomes of initial reproductive decisions provides a novel, sex neutral hypothesis for the evolution of individuals who express adaptive (fitness enhancing), flexible “sex role” behavior. The model requires no assumptions about past selection favoring sex differences in reproductive decision-making.

[1 CE credit – please sign up for credit at the door and complete evaluation after the session. Please pay at workshop station at registration desk to receive certificate.]

Participants, at the completion of this activity, will be able to:

1. Discuss alternative hypotheses for the causation of sex roles;
2. Describe the role of demographic stochasticity in the induction of behavior including sex typical behavior; and
3. Discuss a new concept in evolutionary biology: the distribution of “fitness that would be conferred.”

57. INTERACTIVE POSTER SESSION: Depression

Finding Little Albert: Adventures in Our Journey to Watson’s Infant Laboratory

Hall P. Beck, Appalachian State University

Maria Lavooy, University of Central Florida, presiding

In 1920, Watson and Rayner claimed to have conditioned a baby boy, Albert, to fear a laboratory rat. Albert disappeared after the last testing session, creating one of psychology’s greatest mysteries. This talk chronicles a seven-year search that led to the individual believed to be Little Albert.

[1 CE credit – please sign up for credit at the door and complete evaluation after the session. Please pay at workshop station at registration desk to receive certificate.]

Participants, at the completion of this activity, will be able to:

1. Describe the relevance of historical studies, such as the Watson and Rayner (1920) investigation, to current psychological research and practice;
2. Describe how historical inquiries, like the search for Little Albert, can be used to train student investigators and to resolve historical mysteries; and
3. Analyze historical evidence, in particular the validity of Beck’s claim that Douglas Merritte was Little Albert.
